Cryopak, USA appoints Vacker Group, UAE as distributor to expand in Middle East Region for Temperature Data Loggers and Real Time Monitoring Systems

EDISON, NJ – January 21, 2014 -- <http://www.cryopak.com> Cryopak, USA, part of the TCP Reliable Group, a leading supplier of various products and services for temperature monitoring and cold chain packaging for all industrial and commercial applications including pharmaceutical, healthcare, food and chemical industries has appointed Vacker Group, UAE, as an authorized distributor. Vacker will represent Cryopak business interests in the Middle East for verification products which covers the entire range of data loggers and real time monitoring solutions.

The products and services being offered by Cryopak are:

- a. Verification products which cover various data loggers marketed under the name Escort™
- b. Mirador™ wireless real time monitoring solutions with phone call, email & SMS alert systems
- c. Temperature mapping study, temperature profile study & cold chain compliance services
- d. Cold chain packaging solutions including refrigerant gel, phase change material, insulated shipping containers, insulated pallet shippers, pre-qualified shipping containers and protective packaging products.
- e. Testing services for thermal package, package strength and package integrity

Vacker Group of companies (<http://www.vackerglobal.com>) head quartered in Dubai, United Arab Emirates is specialized in Automation and Environment monitoring solutions. Presently the group has offices in UAE, Kuwait & Oman and is in the process of expanding to other Middle East countries including Kingdom of Saudi Arabia, Qatar, Bahrain & Iraq. The products and services being offered by the Group in this segment include:

- a. Real time temperature monitoring and recording solutions for hospitals, cold rooms, chillers, warehouses, shipping, data centers, etc...
- b. Supply of data loggers for various applications
- c. Temperature mapping and validation study for warehouses, cold rooms, vehicles etc.
- d. Automation including various alert facilities for Environment monitoring systems

About Cryopak:

Cryopak includes three divisions, Cryopak Verification Technologies, Cryopak Cold Chain Packaging Solutions and Cryopak Testing Services Center. Cryopak Verification Technology specializes in the monitoring of temperature sensitive products and includes products such as data loggers as well as Mirador, a wireless tracking solution that monitors temperatures in real time. Cryopak Cold Chain Packaging manufactures temperature controlled products such as refrigerant gel packs and insulated shipping containers. Cryopak Testing Services Center offers testing services for pharmaceutical distributors.
