

Industrial Desiccant Dehumidifiers- Stationary type

About Vacker Group:

Activities:

- Environment Monitoring solutions
- Cold Chain Management Solutions
- Dehumidifiers
- Data Loggers
- Automation

These are high performance industrial desiccant dehumidifiers manufactured by Trotec, Germany under the series T T R

Features:

- Durable, low-maintenance and flexibly configurable with high dehumidification performance even at low dew points.

Features:

- Electronic regulation of dry air amount – Infinitely adjustable (from T T R 2400)
- Due to a wide range of equipment options it is individually configurable for any application

Possible uses :

- Dehumidification of unheated rooms, e.g. in water processing facilities and pump stations to prevent condensation on lines, storage containers and pumps
- Prevention of corrosion in electrical control centers, boiler plants, turbines and pipe systems in power plants

Possible uses :

- Constant guarantee of a low relative humidity in industrial production facilities and storerooms, for example in the food, dairy and pharmaceutical industry

Possible uses :

- Corrosion protection for ships in control and machine rooms as well as moisture-sensitive loads during transport

Possible uses :

- Prevention of corrosion in fuel depots or ships' holds in connection with sandblasting or painting work

Other applications

Similar applications for other industries:

- Fruits & Vegetables
- Food processing
- Chemicals
- Electronics Items
- Hotels & Restaurants
- Construction, Cement & Steel Industries

Associates

Apart from our own products, we are also exclusive dealers of following companies in the Middle East
